PROFESSIONAL SUMMARY

Full-stack developer experienced in creating dynamic, scalable web applications using React.js, Angular, and Spring Boot. Expertise in modular frontend development and robust backend services. Proficient in Agile methodologies and RESTful APIs, with strong emphasis on clean code, performance, and maintainability.

EDUCATION

LD College of Engineering   Ahmedabad, Gujarat
Bachelor of Engineering in Computer Engineering (CGPA: 8.6)   *2021 – 2025*
Lions English School   Silvassa, Dadra and Nagar Haveli
Higher Secondary (CBSE, Percentage: 91%)   *2019 – 2020*
ShivPrakash Memorial School   Silvassa, Dadra and Nagar Haveli
Senior Secondary (CBSE, Percentage: 93.2%)   *2017 – 2018*

EXPERIENCE

Programmer Analyst Trainee   2025 – Present
Cognizant Technology Solutions   *India*
- Completed full-stack training in Spring Boot, Angular, REST APIs, and SQL, applying modern practices.
- Contributed to Agile sprint tasks such as feature development, UI fixes, and backend improvements.
- Used AI-assisted tools to speed up debugging, documentation, and code optimization.

Trainee Engineer   Jan 2025 – May 2025
Simform Solutions   *Ahmedabad, Gujarat*
- Developed and optimized React.js components using TypeScript, Hooks, and modern state management.
- Improved code quality through refactoring, API integration, and active code reviews.

PROJECTS

Ecommerce Web Application | *Spring Boot, Angular, REST APIs, SQL* [Live] [GitHub]
- Engineered a full-stack ecommerce platform supporting authentication, product browsing, cart operations, and secure session handling.
- Developed modular Angular components and integrated Spring Boot REST APIs, ensuring fast data flow and a responsive user experience.

Netflix Clone | *React.js, Firebase, TMDb API* [GitHub] [Live]
- Implemented a Netflix-like streaming interface with Firebase authentication and real-time content rendering via TMDb API.
- Enhanced user experience with responsive layouts, optimized image loading, and smooth navigation across devices.

Atomix - Component Library | *React.js, TypeScript, Storybook* [GitHub]
- Built a reusable UI component library with standardized elements like modals, tabs, and inputs to speed up frontend development.
- Documented components in Storybook, improving consistency, discoverability, and integration across teams.

TECHNICAL SKILLS

Languages: Java, C/C++, SQL, JavaScript, TypeScript, HTML, CSS, Python
Frontend: Angular, React.js, Tailwind CSS, Material-UI, Bootstrap, styled-components, Storybook
Backend & Database: Spring Boot, Node.js, Redux Toolkit, TanStack Query, Zod, Firebase, MySQL
DevOps & Tools: Git, GitHub, Vercel, VS Code, Android Studio, Docker, AWS, Jenkins
Methodologies: Agile, CI/CD, Test-Driven Development, Scrum, DevOps, Microservices
Core Skills: Problem Solving, Team Leadership, Cross-functional Collaboration, Technical Communication

CERTIFICATIONS

Google Cloud Foundations | **Frontend Masters - TypeScript** | **Intermediate TypeScript** | **Web Development v3**

ACHIEVEMENTS

1600+ rating on LeetCode | 3500+ rating on Coding Ninjas Code360 | Represented GTU in SSIP Hackathon
